

Do You or Someone You Know Have Velocardiofacial Syndrome? DiGeorge Syndrome?

The National Institute of Mental Health is conducting a study that looks at the genetic makeup of cells, how the brain functions, and the increased risks for psychiatric problems, in people who have Velocardiofacial (DiGeorge or 22q11.2) Syndrome. Participants will undergo functional and structural brain imaging, and a psychiatric evaluation.

Participants must:

- 1) Have Velocardiofacial (DiGeorge or 22q11.2) Syndrome
- 2) Be between the ages of 18-50
- 3) Have at least completed up to 8th grade
- 4) Not currently be taking antipsychotic medication

**Financial compensation, travel funds & lodging
will be provided for participation.**
